According to recent research, people take in fewer calories when they slow their eating pace. Not only does eating slowly make you eat less, it also helps your stomach process the food well. When you eat slower, you'll chew your food more, which leads to better digestion. Plus, you can be happier by tasting great food and enjoying it fully. 다음을 듣고, 물음에 답하십시오.

W: Good evening, Music Alive listeners! I'm your host, Kate Anderson. Tonight, I'm going to talk about African-American music. We're going to see some types of African-American music throughout modern history. One of the earliest was blues, which developed in the first decade of the 20th century. It's a combination of African work songs and shouts. And it's also the basis for much of modern American popular music. Later on, jazz became a major form of musical expression beginning in the 1920s. It has roots in West African musical expression and is characterized by call and response vocals and different rhythms. Next, funk is a music style that originated in the mid-1960s. African-American musicians who created this new form of music focused less on melody and more on danceable rhythms. Finally, hip hop is a music genre developed in the 1970s. It consists of a stylized rhythmic music that often comes with rapping. It developed into its own culture, too. Now, let's listen to some famous music from each genre.
